1 AFFIDAVIT IN SUPPORT OF APPLICATION FOR SEARCH WARRANT

2 I, Special Agent Christiana Huntzinger, upon being duly sworn do hereby state that the
3 following is true to my knowledge and belief:

4 1. I am a Special Agent with the Naval Criminal Investigative Service, assigned to
5 the San Diego Field Office, and have been in this position for over 9 years. I am currently
6 assigned to the Special Operations Division of the NCIS San Diego Field Office and am a full
7 time member of the Internet Crimes Against Children (ICAC) task force in San Diego, CA. I
8 have attended and successfully completed the Criminal Investigator Training Program and the
9 Naval Criminal Investigative Service Special Agent Basic Training program at the Federal Law
10 Enforcement Training Center in Glynco, GA. I graduated Cum Laude from the University of
11 New Mexico with a Bachelor of Arts degree in Criminology and received a Master of Science
12 degree in Forensic Science with Honors from National University. I have also received extensive
13 training in conducting Internet investigations regarding the sexual exploitation of minors, child
14 pornography, and the preservation and review of computer related evidence. Throughout my
15 tenure with NCIS, I have conducted or participated in numerous death, sexual assault, larceny,
16 narcotics, child molestation, and child pornography investigations. As part of my duties with the
17 ICAC, I investigate criminal violations relating to child exploitation and child pornography
18 including violations pertaining to the illegal production, distribution, receipt, and possession of
19 child pornography, in violation of 18 U.S.C. §§ 2251 and 2252(a). Additionally, I have had the
20 opportunity to observe and review numerous examples of child pornography (as defined in 18
21 U.S.C. § 2256) in all forms of media including computer media, and I have written and
22 participated in the execution of numerous federal and state search warrants, probation searches,
23 and U.S. Navy Command Authorized searches, which involved child exploitation and/or child
24 pornography offenses.

25 2. This affidavit is offered in support of an application by the United States of
26 America for a search warrant for Facebook. I seek authority to search Facebook, located as
27 described in Attachment "A", for

1 a. the following Facebook account as described in Attachment "B", paragraph II:
2 Brock G. Mason, with URL: <https://www.facebook.com/brock.gabriel> from June
3 11, 2013 to the present, for items which constitute evidence, fruits, and
4 instrumentalities of violations of federal criminal law, namely, Title 18, United
5 States Code, Sections 2251 (manufacturing of child pornography) 2252
6 (possession, receipt, distribution of child pornography), 2422(b) (coercion and
7 enticement of a minor).

8 3. This affidavit is based upon information I have gained through training and
9 experience, as well as upon information related to me by other individuals, including law
10 enforcement officers. Since this affidavit is being submitted for the limited purpose of securing a
11 search warrant, I have not included each and every fact known concerning this investigation but
12 have set forth only the facts that I believe is necessary to establish probable cause to believe that
13 evidence relating to violations of Title 18, United States Code §2252, 2251, 2422(b) is located at
14 the address described in Attachment A.

15 4. Based upon the following information, I believe there is probable cause to believe
16 that currently located within the above-described location (See Attachment "A") there is
17 evidence, fruits and instrumentalities of trafficking, receipt, distribution, and/or possession of
18 visual depictions, and other related materials, involving minors engaging in sexually explicit
19 conduct (child pornography), in violation of Title 18 U.S.C. § 2252, 2251, and 2422(b) et seq.,
20 more particularly described in Attachment "B."

23 **CYBERTIPLINE**

24 5. Facebook is a free social networking service that allows users to create their own
25 profile pages, which can include lists of their favorite musicians, books and movies, images of
26 themselves and friends, and links to pages within and outside the Facebook environment. When
27 an individual sets up a particular Facebook account, the user provides their name, however,
28 Facebook does not check to determine if the Facebook name is the user's real name. In order to

1 set up a Facebook account, the user must provide an email account that will be linked to the
2 Facebook page. Facebook also assigns a unique "identifier" to the user's account, which is a
3 series of numbers, and differentiates the account from other accounts with the same name.
4 Facebook also assigns a unique URL to a particular Facebook page that will differentiate one
5 account from another. Often times, it is not possible for law enforcement to obtain the unique
6 identifier without legal service to Facebook, however, by locating the home page of a particular
7 user, the unique URL will be obtained.

8 6. Facebook allows each user to set the privacy settings on their own account, thus
9 allowing the user to determine if certain information such as their photos, friends list, and home
10 page are available to the public. Facebook provides electronic communication services to its
11 subscribers that is similar to email. Facebook's electronic mail service allows subscribers to
12 communicate with other subscribers and with others through the Internet. These messages remain
private between users and are not publicly available.

13 7. At the creation of a Facebook account and for each subsequent access to the
14 account, Facebook logs the IP address of the computer accessing the account. Obtaining the IP
15 addresses that have accessed a particular Facebook account often identifies the ISP that owns and
16 has leased that address to its customer. Subscriber information for that customer then can be
17 obtained using appropriate legal process.

18 8. An Internet Protocol address or "IP address", is expressed as four groups of
19 numbers separated by decimal points, and is unique to a particular computer during an online
20 session. The IP address provides a unique location making it possible for data to be transferred
21 between computers. IP addresses are leased to businesses and individuals by ISPs. IP addresses
22 can be dynamic, meaning that the ISP assigns a different number to a computer every time it
23 accesses the Internet. IP addresses might also be static if an ISP assigns a user's computer a
24 particular IP address that is used each time the computer accesses the Internet. Internet
25 companies such as Facebook typically log the IP address used by its subscribers to access their
26 respective services, such as email, chat, and instant messaging. These logs are available to law
enforcement via legal process.

27 9. The National Center for Missing and Exploited Children (NCMEC) was
28 established in 1984 as a private, nonprofit organization. NCMEC provides services nationwide
29

for families and professionals in the prevention of abducted, endangered, and sexually exploited children. Pursuant to its mission and its congressional authorization, NCMEC operates the CyberTipline, a forum for private citizens and businesses to report information related to the mission of the NCMEC, including the sexual exploitation of children. When NCMEC receives a CyberTipline report related to the sexual exploitation of children, they conduct some preliminary research to determine the location of the incident, and then forward the information to the appropriate ICAC task force or the appropriate law enforcement agency for follow-up.

10. In accordance with 18 U.S.C. 2258A, if an Internet company such as Facebook locates the presence of child pornography in a user's account, they will prepare a CyberTipline report to NCMEC. While Internet companies such as Facebook will report the presence of any child pornography they find to NCMEC, they do not conduct an exhaustive search of a user's Facebook account, but typically use some automated method for locating images of suspected child pornography.

STATEMENT OF PROBABLE CAUSE

11. On March 19, 2013, the NCMEC received a Cybertipline report from Facebook indicating that on March 13, 2013, a user with FBID: 1181100048 (a prior account associated with the user of the account that is the subject of this warrant application) uploaded 7 images of suspected child pornography. The report indicated the user of the account's name was: "Brock Mason" with corresponding email account: brock1011@gmail.com. Facebook recorded the IP address that uploaded the images to this Facebook account as: 209.242.135.36. Analysts with NCMEC conducted some preliminary research regarding the above IP address utilizing a website available to the public, and determined the IP address is operated by Cox Communications, and the IP address is utilized by a subscriber in San Diego, CA. A search for the email account brock1011@gmail.com by NCMEC located a corresponding blog post: <http://s13.zetaboard.com/OKWrestle/index/>. In this blog post, the user states that he finished college and will be stationed onboard the USS Bonhomme Richard (LHD-6), and that anyone can contact him at: brock1011@gmail.com.

12. The Cybertipline report was forwarded to the San Diego Internet Crimes Against Children task force and assigned to me on April 30, 2013. I reviewed the information and images forwarded by NCMEC and determined that 6 of the 7 images definitively depicted child

entice and coerce a minor to engage in sexually explicit conduct for the purpose of producing a visual depiction of such conduct.

- f. Electronic communications, instant messages, and attachments (sent, saved or received) which contain, attach, or describe communications with minors under the age of eighteen years old involving efforts to employ, use, persuade, induce, entice and coerce a minor to engage in any illicit sexual activity.
- g. All communications with minors D.R.1, D.R.2, T.W.
- h. All records that describe the relationship between MASON and minors D.R.1, D.R.2, T.W.
- i. User-attribution data to include data reflecting who used or controlled the Facebook account at or around the time that data reflecting criminal activity within the scope of this warrant was created, accessed, deleted, modified, copied, downloaded, uploaded or printed.
- j. Any and all materials or items which are sexually arousing to individuals who are interested in minors, but which are not in and of themselves obscene or which do not necessarily depict minors involved in sexually explicit conduct. Such material is commonly known as "child erotica" and includes written materials dealing with child development, sex education, child pornography, sexual abuse of children, incest, child prostitution, diaries about sexual contact with children, and fantasy writings as well as photographs of children engaged in activities familiar to the individuals interested in minors.
- k. Electronically stored communications or messages reflecting computer on-line chat sessions or e-mail messages with any persons regarding the possession, receipt, distribution, production, advertising and/or reproduction of child pornography, as defined in 18 U.S.C. § 2256.
- l. Any and all usernames, email accounts, or online identities that may have been used for the sexual exploitation of minors or for communications with individuals sharing an interest in the sexual exploitation of minors.
- m. Any and all usernames, email accounts, or online identities that may have been used for communications with individuals appearing to be minors, including but not limited to D.R.1, D.R.2, T.W. and any and all communications with such minors.

15 on his back and is being anally penetrated by the penis of an approximately 10-12 year
16 old boy. Another boy, approximately 7-10 years old, is sitting on the face of the 4-7 year
17 old boy and inserting his penis in the boy's mouth. The two older boys are looking at the
18 camera.
19

20 13. Due to the possibility of a Navy affiliation by the user, I conducted a query in the
21 Department of Defense Employee Interactive Database System (DEIDS) for Brock MASON. I
22 located a U.S. Navy member assigned to the USS Bonhomme Richard, which is currently
23 stationed in Sasebo, Japan. Further queries with the U.S. Navy revealed the USS Bonhomme
24 Richard was out to sea on March 13, 2013, when the images were uploaded to this Facebook
25 account.
26

27 14. Based on the above information, on May 24, 2013, I obtained a federal search
28 warrant from the Honorable Mitchell D. Dembin (13MJ2044), to search the Facebook account
29 for Brock Gabriel MASON, with Facebook ID (FBID: 1181100048) for evidence of violations
involving the receipt, distribution and possession of child pornography. The warrant authorized
me to search the Facebook account for evidence from January 1, 2012 to May 24, 2013. The
warrant was served on Facebook on May 24, 2013 and the results were received on August 5,
2013 and reviewed by me.

15. In reviewing the results for evidence of child pornography as authorized by the original warrant, I located several images of child pornography that were uploaded and then subsequently deleted. In reviewing the Facebook messages for evidence of child pornography, I also viewed messages between MASON and other users who appeared to be minors under the age of 18. Based on the Facebook ID and name of the other Facebook users, I was able to locate and view the Facebook home pages of the other individuals via public access to Facebook to confirm that the accounts appeared to belong to minors. The messages exchanged between MASON and the minors reflect his attempt to (1) entice and persuade the minors to engage in criminal sexual activity, in violation of 18 U.S.C. § 2242 and document violations of 18 U.S.C. 2251 (Manufacturing child pornography). The presence of child pornography images documents MASON's interest in child pornography, in violation of 18 U.S.C. 2252.

16. MASON communicated with the two underage males, twins D.R.1 and D.R.2. Authorities from Oklahoma confirmed on November 6, 2013 that the twins are both minors residing in Oklahoma. D.R.1 has Facebook ID: 100001277835599. I was able to view D.R.1's Facebook page by accessing the Facebook URL:

<https://www.facebook.com/profile.php?id=100001277835599> that is publicly available. The Facebook page shows an image of an approximately 12-14 year old male child, who is black or mixed race, with long, curly, dark brown or black. The child indicates he resides in Oklahoma, and that he has a brother (D.R.2). In one message, D.R.1 appears to get into an argument with MASON and accuses MASON of using him (and his twin) for their “privates.” D.R.1 also threatens to tell his mother about MASON’s activities, and references a time when MASON offered D.R.1 monetary compensation for the opportunity to “suck” D.R.1. In my training and experience, discussion about the opportunity to “suck” D.R.1 refers to an opportunity to orally copulate the minor. D.R.1 also discusses MASON’s prior statements that he loved D.R.1 and D.R.2. and how MASON “touch[ed]” him. D.R.1 also describes how MASON and he communicate via text message and over Facebook.

17. For example, D.R.1 and MASON exchanged the following conversation on February 14, 2013:

Sent 2013-02-14 01:38:46 UTC

1 **D.R.1:** Ur rude bro u already got a good iPod I have spiral of shit iPhone that is

5 u don't love me no more

6 18. On February 18, 2013, the two continued with D.R.1 asking MASON to pick him
7 up. MASON declined, stating that he was watching a movie. D.R.1 pleaded with MASON to
8 pick him up, promising him a "pill" (which MASON declined) and to give MASON back some
9 electronics. MASON referred to D.R.1 as a "lil kid" and told him that D.R.1 should not hang out
10 with MASON. MASON wrote "I'm not good for u and always think about sex. U know that and
11 don't like it."

22

23 **Brock Mason (1181100048):** [D.R.2]?
24

25 20. In addition to the web cam request, on multiple occasions, MASON referenced
26 purchasing a “pill” from D.R.1. On 10/28/12, MASON states, “I can buy a pill from u tnrw” and
27 on 11/16/12 MASON states, “bro I got I test tmrw that’s why I need a pill... I could like drop
28 you off but I cant go tonight.. tmrw maybe.” Based on the context of the conversations and my
29 training and experience, it is believed that the “pill”---which DR1 states he took in response to
MASON’s concern that he is too loud---is prescription medication used to treat conditions like a
minor’s hyperactivity or attention deficit disorder. In my training and experience, I know that
there is a black market for non-prescription abuse of such controlled substances.

1 21. MASON often instructed D.R.1 to delete evidence of their online
2 communications. For example, on March 23, 2013, MASON writes to D.R.1: “Delete ur
3 messages on here though”, and later writes, “Delete our convo”.
4

5 22. MASON also communicated with D.R.2 (FBID:100001126961113). I was able to
6 access D.R.2’s Facebook page via the following URL:
7

8 www.facebook.com/profile.php?id=100001126961113, and it showed an image of an
9 approximately 12-14 year old male child who is black or of mixed race who has short dark brown
10 or black hair. The communications with D.R.2 reflect a video of D.R.1, D.R.2, and MASON
11 created in a hotel room. MASON asks D.R.2 to ensure that the video is deleted. Given his prior
12 statements about sexual activity with D.R.1 and D.R.1’s description of his relationship with
13 MASON, and MASON’s preoccupation with deleting the video, there is probable cause that the
14 video is evidence of an 18 U.S.C. § 2251 offense. D.R.2 and MASON wrote:

22 23. MASON also exchanged messages with a minor, T.W.(FBID: 100005407449127)

23 via URL: www.facebook.com/profile.php?id=100005407449127. In the communications, MASON discusses D.R.1 and D.R.2, suggests that he knows the size of D.R.1's penis, asks T.W. for a photograph of D.R.1's penis, and then requests a photograph of her "boobs." The two began with a sexual conversation about T.W.'s sexual activity with D.R.1, where MASON evidenced his knowledge of their youth:

24 **Sent** 2013-04-12 16:32:13 UTC

25 Brock Mason (1181100048): you been talking or hanging out wit the [D.R.1 and
26 D.R.2] twins>? lol

17 T.W.: yeah it was big .

18 24. MASON and T.W. continued their conversation, where MASON asked for
19 details about her sexual activity with D.R.2. In this conversation, MASON references his
20 knowledge about the size of D.R.2's penis.

21 **Sent** 2013-04-16 11:54:42 UTC

22 Brock Mason (1181100048): so how come u said u had sex with [DR2]?

21 26. The Facebook results indicate that MASON's Facebook page used in the above
22 communications was "disabled" on May 30, 2013. In reviewing the publicly available Facebook
23 pages of DR1 and DR2, I was able to locate a new Facebook page for "Brock G. Mason", with
24 URL: www.facebook.com/brock.gabriel. The Facebook user ID is unknown for this new account.
25 I was able to view the home page of this Facebook account and located an image of MASON as a
profile photo and a photo of him in his Navy uniform that he posted on his page on a previous
date. The Facebook page indicates that he "joined Facebook on June 11, 2013", and there are
several wall posts on his own page indicating he is in Japan. Additionally, in reviewing the "wall
posts" on the publicly available Facebook page for DR1, I located instances where Mason posted
comments from this new Facebook account on DR1's home page that are dated as recent as
October 18, 2013. The comments are not necessarily sexual in nature, but do indicate that Mason
and DR1 are still in contact.

26 27. As a result of my training and experience in child exploitation and child
27 pornography investigations, and the training and experience of other law enforcement officers
28 with whom I have had discussions, there are certain characteristics common to individuals
29

1 involved in the distribution and collection of child pornography:

2 a. Individuals who are sexually attracted to children and who feel a need to interact
3 with them will go wherever the children go. In today's world, children go on the Internet,
4 and more particularly, to certain social networking websites that cater to youth. Such
5 websites that are frequented by minors allow the users to exchange photos or video, have
6 a chat function, allow the user to post his/her age, allow the user to post the school that
7 he/she attends, and have a networking function that allows users to make friends easily.
8 This affords other individuals the opportunity to "shop" for individuals of their choosing.
9 These websites include but are not limited to: Facebook, MeetMe, Twitter, IMVU, and
10 Yahoo Chat.

11 b. Adults who are engaging in this sort of activity via social networking websites are
12 aroused by children and aroused by the challenge of enticing and coercing minors to
13 engage in sexual chat messages and to send sexual images. For some of them, their
14 arousal is met by communicating sexually with minors and grooming them to perform
15 certain sexual acts. Sometimes the end goal is to groom the child to the point of the child
16 being willing to meet with them in person for the purpose of engaging in sexual acts.
17 Other individuals, however, may engage in the activity in order to gain nude images of
18 the child to add to a collection of other child pornography.

19 c. If the individual is also a collector of child pornography, they are always looking to
20 add new images to their collection and treat their material as prized possessions and are
21 especially unlikely to part with them. Even if the collector feels threatened by exposure
22 to law enforcement, he will usually seek to preserve his collection by hiding it better,
23 such as in their vehicle, rather than by destroying it. The collection may be culled and
24 refined, but the size of the collection tends to increase over time. This is particularly true
25 since digital storage media have increased in storage capacity as they have decreased in
26 cost.

27 d. In fact, many collectors protect their collections by creating back-ups, sometimes
28 multiple back-ups, of some or all of the collection. Child pornography, unlike some other
29 kinds of contraband (e.g. drugs), is not "consumed" by the user. The "consumption" of

1 this product results in its proliferation; more copies are generated. The very nature of
2 computers as a means of collection, transmission, and/or storage lends itself to permanent
3 preservation of the item. If the collector relocates, his collection almost always moves
4 with him.

5 e. Individuals who collect child pornography and/or save communications and images
6 from children they communicate with on the Internet tend to maintain and possess their
7 material in the privacy and security of their homes or some other secure location like their
8 vehicles where it is readily available. The collection may include sexually explicit or
9 suggestive materials involving children, such as photographs, digital images, magazines,
10 narratives, motion pictures, DVDs, CD-ROMs, video tapes, books, slides, drawings,
11 computer images or other visual media or sexually based communications.

12 f. Individuals who have a sexual interest in children or images of children also may
13 correspond with and/or meet others to share information and materials; rarely destroy
14 correspondence from other child pornography distributors/collectors; conceal such
15 correspondence as they do their sexually explicit material; and often maintain lists of
16 names, addresses, and telephone numbers of individuals with whom they have been in
17 contact and who share the same interests in child pornography.

18 g. Individuals who have a sexual interest in children or images of children prefer not to
19 be without their child pornography for any prolonged time period. This behavior has
20 been documented by law enforcement officers involved in the investigation of child
21 pornography throughout the world.

22 h. Online predators may receive sexual gratification, stimulation, and satisfaction from
23 contact with children; or from fantasies they may have viewing children engaged in
24 sexual activity or in sexually suggestive poses, such as in person, in photographs, or other
25 visual media; or from literature describing such activity.

26 i. Online predators may collect sexually explicit or suggestive materials and oftentimes
27 use these materials for their own sexual arousal and gratification. Furthermore, they may
28 use these materials to lower the inhibitions of children they are attempting to seduce, to
29 arouse the selected child partner, or to demonstrate the desired sexual acts. Many of these

1 communications are done online via email, instant messaging, or via instant messaging
2 and email functions of social networking websites.

3 j. Online predators often maintain their child pornography or discussions about the molest
4 of children in a safe, secure and private environment, such as an online account,
5 computer, or in their residence. These collections are often maintained for several years
6 and are kept accessible, to enable the collector to view this material, which is valued
7 highly.

8 k. Online predators often correspond with and/or meet others to share information and
9 materials; are rarely able to completely destroy correspondence from other child
10 pornography distributors/collectors; conceal correspondence as they do their sexually
11 explicit material; and often maintain lists of names, addresses, and telephone numbers of
12 individuals with whom they have been in contact and who share the same interests in
13 child pornography or the molest of children.

14 28. The person using the Facebook account and email account listed in Attachment B
15 exhibits the common characteristics described above of someone involved in the distribution,
16 receipt, and possession of child pornography, and the coercion and enticement of minors as
17 evidenced by the facts that are set forth in this Affidavit, including the fact that the person
18 uploaded images of child pornography to the Facebook account.

19

20 **PROCEDURES FOR ELECTRONICALLY STORED INFORMATION**

21 29. Federal agents and investigative support personnel are trained and experienced in
22 identifying communications relevant to the crimes under investigation. The personnel of
23 Facebook are not. It would be inappropriate and impractical for federal agents to search the vast
24 computer network of Facebook for the relevant accounts and then to analyze the contents of
25 those accounts on the premises of. The impact on Facebook's businesses would be severe.

26 30. Therefore, I request authority to seize all content, including electronic mail and
27 attachments, stored instant messages, stored voice messages, images, videos, wall posts, friends
28 lists, subscriber information, IP logs and any other content from the Facebook account, as

1 described in Attachment A. In order to accomplish the objective of the search warrant with a
2 minimum of interference with the business activities of Facebook, to protect the rights of the
3 subject of the investigation and to effectively pursue this investigation, authority is sought to
4 allow Facebook to make a digital copy of the entire contents of the accounts subject to seizure.
5 That copy will be provided to me or to any authorized federal agent. Specifically, Facebook will
6 be authorized to place the entire contents of the accounts subject to seizure, copy them onto
7 removable electronic storage media, and place send the removable electronic storage media
8 through an express delivery service to the requesting agent, Special Agent Christiana Huntzinger.
9 The copy will be forensically imaged and the image will then be analyzed to identify
10 communications and other data subject to seizure pursuant to Attachment B. Relevant data will
11 be copied to separate media. The original media will be sealed and maintained to establish
12 authenticity, if necessary.

13 31. Analyzing the data to be provided by Facebook requires special technical skills,
14 equipment and software. It also can be very time-consuming. Searching by keywords, for
15 example, often yields many thousands of "hits," each of which must be reviewed in its context by
16 the examiner to determine whether the data is within the scope of the warrant. Merely finding a
17 relevant "hit" does not end the review process. Certain file formats do not lend themselves to
18 keyword searches. Keywords search text. Many common electronic mail, database and
19 spreadsheet applications, which files may have been attached to electronic mail, do not store data
20 as searchable text. The data is saved in a proprietary non-text format. And, as the volume of
21 storage allotted by service providers increases, the time it takes to properly analyze recovered
22 data increases dramatically.

23 32. Based on the foregoing, searching the recovered data for the information subject
24 to seizure pursuant to this warrant may require a range of data analysis techniques and may take
25 weeks or even months. Keywords need to be modified continuously based upon the results
26 obtained. The personnel conducting the examination will complete the analysis within ninety
27 (90) days of receipt of the data from the service provider, absent further application to this court.

33. Based upon my experience and training, and the experience and training of other agents with whom I have communicated, it is necessary to review and seize all electronic mails that identify any users of the subject account(s) and any electronic mails sent or received in temporal proximity to incriminating electronic mails that provide context to the incriminating mails.

34. All forensic analysis of the imaged data will employ search protocols directed exclusively to the identification and extraction of data within the scope of this warrant.

GENUINE RISKS OF DESTRUCTION

35. Based upon my experience and training, and the experience and training of other agents with whom I have communicated, electronically stored data can be permanently deleted or modified by users possessing basic computer skills. In this case, only if the subject receives advance warning of the execution of this warrant, will there be a genuine risk of destruction of evidence.

PRIOR ATTEMPTS TO OBTAIN DATA

36. The United States has not attempted to obtain this data by other means.

REQUEST FOR SEALING AND PRECLUSION OF NOTICE

37. This is an ongoing investigation of which the target(s) are unaware. It is very likely, based upon the above, that evidence of the crimes under investigation exists on computers subject to the control of the targets. There is reason to believe, based on the above, that premature disclosure of the existence of the warrant will result in destruction or tampering with that evidence and seriously jeopardize the success of the investigation. Accordingly, it is requested that this warrant and its related materials be sealed until further order of the Court. In addition, pursuant to Title 18, United States Code, Section 2705(b), it is requested that this Court order the electronic service provider to whom this warrant is directed not to notify anyone of the

1 existence of this warrant, other than its personnel essential to compliance with the execution of
2 this warrant until further order of the Court.
